Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract exceeds 150 words in length.

Claim Objections

2. Claims 1-31 are objected to because of the following informalities:

In claim 1 (lines 6 and 12), claim 4 (line 4), claim 5 (lines 2 and 6), claim 6 (lines 2 and 6), claim 11 (lines 6 and 12), claim 14 (line 3), claim 15 (lines 2 and 6), claim 16 (lines 2 and 6), claim 21 (lines 6 and 13), claim 24 (line 4), claim 25 (lines 2 and 6), claim 26 (lines 2 and 6), and claim 31 (lines 5 and 11), "samples signals" should be -- sample signals --.

In claim 4 (lines 1, 2, and 5), claim 14 (lines 1 and 2), and claim 24 (lines 1 and 2), "a plurality of" and "an vector" should be -- said plurality of -- and -- a vector --, respectively.

Art Unit: 2634

In claim 7 (line 9), claim 17 (line 9), and claim 27 (line 9), "a block said" should be -- a block of said --.

Wherein the dependent claims 2-3, 8-10, 12-13, 18-20, 22-23, 28-30 are directly or indirectly depended upon claims 1, 11, or 21.

In claim 31, line 9, the word "and" should be deleted.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The configuration of claims 1-31 does not correspond to the disclosure of the drawings. For example, figure 1 is the only apparatus shown in the instant application and no further detail embodiment of the receiver is shown. However, claims 11-31 are directly related to an apparatus and computer readable medium for estimating transmitted data symbols from a plurality of signal samples received by a plurality of receivers.

In other words, the disclosure lacks support how to perform the operation of the method as recited in claims 1-10 and what are the devices used to operate the apparatus as recited in claims 11-31.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 2, 12, and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2 (lines 2 and 3-4), claim 12 (lines 2 and 3-4), and claim 22 (lines 2 and 3-4), "said plurality of transmitters" lacks antecedent basis.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

References Marchetto et al., Sawahashi et al., Wallace et al., Shimizu et al., and Kadous are made of record as describing a related method and apparatus for estimating transmitted data symbols from a plurality of signal samples received by a plurality of receivers.
